

KANAK LATWAL

Dehradun, Uttarakhand | +91-8755423748 | kanaklatwal@gmail.com | [LinkedIn](#) | [GitHub](#)

Career summary

I am a Full-stack developer with a strong foundation in Java, web development, problem-solving, and machine learning concepts. I have experience in building responsive applications and real-world projects using React.js, Node.js, JavaScript, Python, and Java. I am passionate about developing scalable and efficient solutions while continuously learning emerging technologies to contribute to innovative development teams .

Education

Graphic Era Hill University

Master of Computer Applications (MCA)

July 2024 – June 2026 (Expected)

CGPA: 8.2 — DSA, C, Full Stack Development, DBMS, Java, Python

Soban Singh Jeena University

Bachelor of Science (B.Sc.)

July 2021 – June 2024

Percentage: 71.6 — Physics, Mathematics, Statistics

Certifications

Certificate of Participation Certificate of Participation from Graph-e-Thon 2.0 organized by Technology Business Incubator, Graphic Era University

AWS Training Certificate Completed AWS Training on Fundamentals of Machine Learning and Artificial Intelligence

Projects

Scam Detection System — [GitHub](#) — [Live](#)

Jan 2025 – Present

Email & URL Fraud Detection System

Python, Scikit-learn, Pandas, NumPy, React.js, Node.js, REST APIs

- Developed a machine learning classification system using Python, Scikit-learn, and Pandas that achieved 85% accuracy in identifying fraudulent emails and URLs.
- Performed advanced feature engineering and model evaluation to optimize detection and reduce false positives.
- Engineered a responsive web interface using React.js and Node.js, integrating the ML model via REST APIs for real-time analysis.

StreamVerse — [GitHub](#) — [Live](#)

Aug 2024 – Oct 2024

Netflix Clone Web Application

React.js, Node.js, Express.js, TMDB API, Axios

- Architected a full-stack web application using MongoDB, React.js, Node.js, and Express.js to simulate a high-traffic streaming platform
- Integrated the TMDB API to fetch and display dynamic movie data and real-time search results across various categories.
- Implemented secure user authentication and authorization protocols to provide personalized and secure user experiences.
- Optimized application performance by implementing lazy loading and caching, reduced initial load times by 30% through lazy loading .

Autonomous Drone Detection — [GitHub](#) — [Live](#)

Sep 2024 – Dec 2024

AI-Powered Drone Detection System

Python, OpenCV, Machine Learning, Artificial Intelligence

- Developed a real-time AI surveillance system utilizing Computer Vision and Machine Learning algorithms .
- Programmed detection and classification scripts using Python and OpenCV to identify drone movements with high precision.
- Designed a responsive monitoring interface to visualize and track real-time drone data for security applications.
- Enhanced system response time and detection accuracy through algorithmic optimization for surveillance environments.

Technical Skills

Programming Languages: Java, Python, C, JavaScript

Web Development: React.js, HTML5, CSS3, Bootstrap, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Machine Learning & AI: Scikit-learn, Pandas, NumPy, OpenCV

Tools & Platforms: Git, GitHub, VS Code, Postman, AWS

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, OOPs, Computer Networks
